## 3. HAZARDS IDENTIFICATION

### SYMPTOMS/EFFECTS OF OVEREXPOSURE

**Inhalation:** May irritate the nose, throat, and lungs. Exposure to high doses may cause central nervous system depression (anesthetic-like effects). Doses which cause anesthetic-like effects may also cause adverse effects in liver, lung, and kidney.

**Ingestion:** Low order of toxicity. May cause mild nausea and abdominal discomfort

**Skin:** Prolonged exposure will cause a skin irritation.

**Eyes:** Contact with eyes may cause mild irritation.

**Listed Carcinogens:** None

## 4. FIRST AID MEASURES

**Inhalation:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Consult a physician.

**Ingestion:** Do not induce vomiting. Seek medical attention.

**Skin:** Remove contaminated clothing. Thoroughly wash affected area with soap water; use skin cream if irritation is severe.

**Eyes:** Immediately flush eyes with water for 15 minutes. Call a physician if irritation persists.

## 5. FIRE FIGHTING MEASURES

**Extinguishing Media:** Dry chemical, chemical foam, carbon dioxide. Class BC, ABC fire extinguisher.

**Special Fire Fighting Procedures:** Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.

---

**5. FIRE FIGHTING MEASURES** **CONTINUED**

**Unusual Fire and Explosions Hazard:** Vapors can travel considerable distances to source of ignition. Exposure to extreme heat can give rise to thermal decomposition.

---

**6. ACCIDENTAL RELEASE MEASURES**

Absorb spill with inert material, then place in chemical waste container. Clean up residue with an appropriate organic solvent. For large spills, dike for later disposal. Observe government regulations.

---

**7. HANDLING AND STORAGE**

Store in original container, preferably in a cool ventilated, fire-resistant building. Avoid overheating or freezing. Avoid open flames and sparks. Since empty containers may retain product residues (vapor, liquid, or solid) all label precautions must be observed.

---

**8. EXPOSURE CONTROLS – PERSONAL PROTECTION**

**Respiratory:** Use NIOSH/MSHA approved respirator if ventilation is not sufficient and if mists are generated.  
**Ventilation:** If desirable to reduce odor, local exhaust can also be effective in minimizing odor. Provide sufficient ventilation to maintain emissions below recommended exposure limits.  
**Clothing/Glove:** Chemically resistant gloves should be used with all industrial chemicals.  
**Eye Protection:** Safety glasses/goggles are recommended. Provide eye bath near work site.
