

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2018

DateRun: 08/29/2018

Experimenters: Vinh Tran, Othon Pagounes, Ted Kearney

ClientType: Cleaner Manufacturer

ProjectNumber: Project #1

Substrates: Aluminum, Ceramics, Plastic, Painted metal

PartType: Coupon

Contaminants: Dirt

Cleaning Methods: Manual Wipe

Analytical Methods: Gravimetric, Visual

Purpose: To evaluate and compare the effectiveness of the Alpha Chemical Sample Formulas when it comes to the removal of vehicle dirt on a variety of substrates.

Experimental Procedure: All aluminum, ceramic, acrylic plastic, and painted steel coupons were pre weighed and had one half of a gram of Vehicle Dirt soil (45% lithium grease, 39% motor oil, and 16% bike dirt) distributed onto each coupon. Three coupons of every substrate were designated to each respective cleaner. The dirty weights were recorded; three coupons of the same substrate were aligned into a Single Line Washing Unit (SLW) with Wypall X60 attached to each cleaning sled. The Wypall X60 reinforced wipe along with the coupons were all sprayed three times with the cleaner and then allowed to soak for 30 seconds. Afterwards the Single Line Washing Unit (SLW) was activated and cleaned for 20 cycles. The clean coupons were all then allowed to dry at room temperature before the final weights were recorded. The coupons were cleaned again using the same process with its respective cleaner, and all data and observations recorded.

Results:

Cleaner	Substrate	Initial wt. of cont. (g)	Final wt. of cont. (g)	% Cont. Removed	Average % Content Removed Per Trial	Average % Content Removed	Overall Average % Content Removed
Alpha Chemical Sample C Formulation	Aluminum	0.5572	0.0571	89.75	90.69	87.86	89.64
		0.5272	0.0329	93.76

Overall% Removal Per Substrate

Cleaner	Aluminum %	Ceramic %	Acrylic Plastic %	Painted Steel %
Alpha Chemical Sample C Formulation	87.86	93.34	88.22	89.13
Alpha Chemical Sample G Formulation	87.78	94.64	88.90	91.45
Alpha Chemical Sample M Formulation	84.40	94.48	88.33	90.67

Summary:

Substrates:	Aluminum, Ceramics, Plastic, Painted metal				
Contaminants:	Dirt				
Company Name:	Product Name:	Conc.:	Efficiency:	Effective:	Observations:
Alpha Chemical Services	Sample C Formulation	100	89.64	<input checked="" type="checkbox"/>	
Alpha Chemical Services	Sample G Formulation	100	90.69	<input checked="" type="checkbox"/>	
Alpha Chemical Services	Sample M Formulation	100	89.47	<input checked="" type="checkbox"/>	

Conclusion:

Alpha Chemical Sample C Formulation, Alpha Chemical Sample G Formulation, and the Alpha Chemical Sample M Formulation are all just as effective in the removal of vehicle dirt from multiple surfaces.
