

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 1998

DateRun: 06/22/1998

Experimenters: Jason Marshall

ClientType: Recycling

ProjectNumber: Project #1

Substrates: Plastic

PartType: Coupon

Contaminants: Adhesive

Cleaning Methods:

Analytical Methods:

Purpose: Aqueous solution to remove acrylic adhesive

Experimental Procedure: QUESTION #: 1
SUBSTRATE MATERIAL: Plastic-polystyrene
QUESTION ASKED: Working on a project that requires the removal of acrylic based adhesive from a polystyrene surface. The polystyrene cannot be degraded in any way. Do you have any ideas of what kind of aqueous solution will be able to do this?

Results: RESPONSE/ANSWER: In 1998, the Massachusetts Toxics Use Reduction Institute (TURI) will publish the results of the tests conducted at the Institutes Surface Cleaning Laboratory (SCL) in a searchable database/spreadsheet format. This should make alternative cleaner selection faster and easier. Table 1 contains the results of your query, based on the information supplied:

SCL #	Substrate	Contaminant	Process	Cleaner
