\*Trial Numbering System for the laboratory trial notebooks.

- 1- Preliminary compatibility tests on substrate coupons encouraging for at least one cleaning chemistry. More in-depth laboratory testing necessary
- 2- Results successful using TACT (time, agitation, concentration, and temperature, as well as rinsing and drying) and/or other cleaning chemistries examined
- 3- Results suggest a scale-up feasible match for cleaning chemistry and equipment. Pilot plant study with actual parts recommended.
- 4- A follow up test, usually based on company input
- 5- A cleanliness study, addressing only various analytical techniques
- 6- Test incomplete or inconclusive
- 7- Test showed little or no promise
- 8- Final Report only
- 9- Technology Transfer
