

DARACLEAN® 282 Aqueous Cleaning Solution

- Aerospace Compliant
- · Low Foam Levels
- Citrus Fragrance
- · Low VOCs
- RoHS Compliant
- Multi-Metal Safe
- Corrosion Inhibitors
- No Phosphates
- · No Chlorine, Sulfur

Safe and Effective

DARACLEAN® 282 is a low-foaming, all-purpose alkaline cleaning solution. Formulated with a blend of surfactants, emulsifiers, and corrosion inhibitors, DARACLEAN® 282 is an excellent cleaner for use on a broad spectrum of soils. Designed to be used with immersion, spray, and ultrasonic applications, it is safe to use with most metals and is non-aggressive towards aluminum, magnesium, and titanium alloys.

Aerospace Qualified

DARACLEAN® 282 has been tested and certified to meet and exceed most Aerospace industry specifications for aqueous and alkaline cleaners. OEM Certifications include Boeing, Douglas, Canadair, GE, Honeywell, Lockheed, Pratt & Whitney, Raytheon, Rolls Royce and Sunstrand. Independent laboratory testing has confirmed that DARACLEAN® 282 complies with AMS 1526, AMS 1537, ARP 1755, and ASTM F-483, F-484, F-485, F-502, F-519, F-945, F-1110, and F-1111.

Soil Rejecting

DARACLEAN[®] 282 has excellent soil-rejecting qualities. After soils are lifted from part surfaces, they are suspended in the cleaner for a short time. Over time, solids will settle out, and oil and grease droplets will coalesce and float on the surface of the solution. Removal of soils can easily be accomplished using filters or skimmers as necessary. This action extends the useful life of DARACLEAN[®] 282 much further than emulsion-type cleaning solutions.

Typical Applications

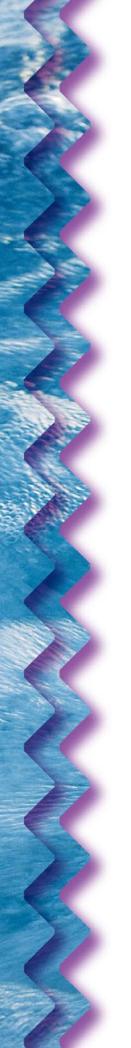

Cleaning Method	Concentration	Temperature	Typical Duration		
Immersion	3–25%	80–180°F (27–82°C)	2–30 minutes		
Ultrasonic	3–25%	80–180°F (27–82°C)	2–30 minutes		
Spray	1–12% 2–5% Recommended	130–180°F (54–82°C)	0.25–3 minutes		
Steam	1–12%	150–200°F (66–93°C)	1–5 minutes		

^{*}Operating parameters should be optimized for each individual application.
