

FINISH LINE[®]

Total Bicycle Care[™]

100% Biodegradable

Citrus Degreaser

UNIQUE CLEANING POWER

100% Biodegradable Formula

100% Undiluted Active Ingredients.

STRONG BUT SAFE

Works without acids, chlorine, alkalines or petroleum solvents.

A natural product made from the distillation of citrus peels.

Its KB (cleaning) value of 110 is unequalled and significantly higher than that of mineral spirits (35) or even xylene (95).

CLEANS AND DEGREASES EVERYTHING

Use in bicycle chain cleaners, parts washers, and pressure washers.

UNIQUE CLEANING POWER: Finish Line Citrus Degreaser really works. And Finish Line's revolutionary 100% biodegradable formula meets today's most stringent environmental regulations. Finish Line Citrus Degreaser contains 100% undiluted active ingredients. Unlike many biodegradable degreasers, Finish Line contains no water. Finish Line's special emulsifiers are activated when rinsing parts with water. The emulsifiers absorb grease and dirt in a white foam, leaving parts clean and residue free.

STRONG BUT SAFE: A truly multipurpose degreaser that quickly dissolves grease, oil, waxes, tars, gum, asphalt, glue, fuel oil residue, soap scum, crayon, ink from rollers, fresh paint, etc. Works without acids, chlorine, alkalines or petroleum solvents. Rather, Finish Line Citrus Degreaser is a natural product made from the distillation of citrus peels. Its KB (cleaning) value of 110 is unequalled and significantly higher than that of mineral spirits (35) or even xylene (95).

CLEANS AND DEGREASES EVERYTHING: Excellent for degreasing bicycles, car or truck engines, motorcycles, sailboat wenchers, industrial machinery, power equipment, driveways and concrete. Perfect for dewaxing snow skies. When diluted with water, Finish Line is an excellent household cleaner/deodorant.

DIRECTIONS FOR USE: Use FULL-STRENGTH in bicycle chain cleaners, parts washers, engine degreasing, dewaxing, and removal of stubborn soils. Agitate with brush or rag as needed. Rinsing part clean with water will activate grease absorbing emulsifiers. If water is not available, solvent residue will slowly evaporate. Always relubricate moving and rust prone parts after degreasing. Dilute with up to 30 parts water to clean and deodorize kitchens, bathrooms, outdoor grills, vinyl, whitewall tires, carpet, sneakers, leather, upholstery and tile floors. Works great in pressure washers.
