

PRODUCT INFORMATION SHEET

POLYCHEM^{*} HYDROPURGE - 21

FOR PAINT AND COATING APPLICATIONS

Description: Polychem^{*} Hydropurge - 21, was developed to remove uncured paints, adhesives, greases and other oils from most substrates without attacking most metals, plastic or glass substrates.

Since Polychem^{*} Hydropurge - 21 has a combination of surfactants, and glycols, it works on a wide variety of stubborn contaminants.

Polychem^{*} Hydropurge - 21 has been found to be a direct replacement for 100% VOC materials in many coating facilities and yields a reduction of VOC use to as much as 1/10th in many applications and a minimum of 1/4th in most other cases.

Polychem^{*} Hydropurge - 21 may be applied by such methods, as wipe on wipe off, spray, immersion, ultrasonics, and floor scrubbing applications.

APPLICATIONS

HAND WIPING
PRESSURE WASHING
DIP WASHING
ULTRASONIC CLEANING
FLOOR CLEANING

TYPES OF CLEANING APPLICATIONS

GUNS, NOZZLES, DISKS,
BELLS, PAILS, DRUMS,
LIDS, FILTERS,
AND HARD SURFACES

****THE HYDROPURGE PROCESS IS PATENTED PAT. NO. 5,632,822***
