

SWC 100 SAFE WIPING CLEANER FOR METAL PARTS

**A Safe, Powerful, and Fast Cleaner
That Does Not Have Toxic Ingredients**

SWC 100 IS A LIQUID CLEANER THAT PROVIDES FAST, POWERFUL WIPE-ON CLEANING FOR OILY METAL PARTS. ITS INGREDIENTS ARE STABLE, SAFE, ENVIRONMENTALLY FRIENDLY AND BIODEGRADABLE.

SWC 100 Features Include:

- ◆ Fast cleaning to water break-free conditions
- ◆ Non-reactive – Does not etch or discolor sensitive metals
- ◆ Safe, no flash point or hazardous substances
- ◆ Effective at low temperatures (60 to 90 degrees F)
- ◆ Biodegradable and environmentally friendly.
- ◆ Economical—low volatility and long effective life.
- ◆ No VOC's
- ◆ No Global Warming, fossil fuel or Ozone Depleting Compounds

If you want to clean oily residues such as machining oils and fingerprints from machined metal parts quickly and safely, *SWC 100* is an ideal solution. The oily contaminants quickly wipe off without the irritating fumes of cleaners like acetone or MEK. It safely cleans a wide range of metals such as plain and electroless nickel plated aluminum, plain steel, coated steel, stainless steel, titanium, copper, and brass.

SWC 100 is good for your operations because it is made from ingredients that are biodegradable, environmentally friendly, and non-hazardous and have no flash point or offensive odor.

SWC 100 does not require special storage, disposal, or removal and is stable, with a long shelf life at normal room temperature storage. Because it is non-reactive *SWC 100* will not etch metal surfaces. It also does not combine with the oily contaminants. They can be easily filtered out for recycling.

SWC 100 does not have any of the Global Warming or Ozone Depleting compounds listed by the South Coast AQMD. This, together with zero VOC's

makes it a good cleaner choice to avoid Government Air Quality regulatory problems now and in the foreseeable future. It also reduces usage of fossil fuels since it does not have any ingredients made from fossil fuels

SPECIFICATION	NOMINAL VALUES
SPECIFIC GRAVITY	1.01 gm/ml
Ph (in solution)	7.8
FEATURES	
FLASH POINT	NONE
WATER SOLUBLE	YES
VOCs	None (EPA Method 24)
BIODEGRADABLE	100%
CLEANING TEMPERATURE	60 to 90 degrees F
