

New Cleaning Science for Warm or Hot Water!

DFC 105 is a unique chemistry that cleans without detergents. Detergent Free Cleaning simplifies carpet maintenance, reduces carpet resoiling and is safe. DFC 105 may be used as a prespray, in Low Moisture Cleaning and all portable, self contained and truck mount extraction equipment.

For optimum results we recommend following Best Practices which include;

1. Vacuum the carpet.
2. Prespray all heavily soiled traffic lanes and brush in.
3. Extract/Rinse carpet.
4. Vacuum the carpet after drying.

How to Mix

Prespray:

6 oz to 1 gallon of water

Portable:

1 oz to 1 gallon of water

TruckMount Stock:

1gallon to 4 gallons of water

Low Moisture Cleaning:

2 oz to 1 gallon of water

Caution:

- Before application, pretest for colorfastness in an inconspicuous area.
- Do not walk barefoot on wet carpet.
- Dispose of any unused product and use solutions according to applicable local, state and federal regulations.
- Read MSDS before use.
- For chemical emergency call Chemtrec at 1-800-424-9300, 24 hours a day, 7 days a week.

Contains:

All Natural Ingredients. Contains no petrochemicals, carcinogens, perfumes, surfactants, Phosphates, NTA, EDTA, Alkali builders, acidic or VOCs.

Product Specifications:
Fragrance: no added scents
Appearance: clear liquid
pH: 7.5 - 8.5

As a prespray:

Add 6 ounces of DFC 105 to 1 gallon warm or hot water (20:1) or 1 powdered ounce of DFC 210 Powdered PreSpray to 1 gallon warm or hot water. Apply to carpet and brush in allowing 5 to 15 minutes dwell time. Extract/Rinse carpet using DFC 105.

For Portable and Self Contained units:

Add 1 ounce of DFC 105 to 1 gallon warm or hot water (128:1).

For TruckMount units:

- Stock Solutions – mix 1 gallon DFC 105 to 4 gallons water (4:1). Set meter setting for a 256 : 1 dilution ratio.
- Direct Feed – insert siphon hose and set meter at 256:1 dilution ratio.

For Low Moisture Cleaning Processes:

Add 2 ounces DFC 105 to 1 gallon warm or hot water (64:1).
