

## Company Overview

### Company Overview

Soy Technologies, LLC is a privately owned specialty chemical manufacturer based in Nicholasville, Kentucky, just south of Lexington. One of the original pioneers of soy-based chemistry, the company develops and markets environmentally safe chemicals to manufacturers and distributors via private label and company brands, both in small packaging and in bulk. Product development includes finished formulas as well as raw materials. With ISO 9002/14001 certified manufacturing facilities and warehousing in Florence, Kentucky, the company is ideally located in the Midwest for cost effective shipments throughout the U.S. as well as international markets.

### Company Background

Soy Technologies was founded in early 2001 in Delray Beach, Florida, as a "think tank" to investigate the market potential and subsequent development of alternative solvents...environmentally safe alternatives to petroleum products and bi-products. Soy was selected as the primary active ingredient in that it is largely a U.S. produced renewable resource, has greater price stability than traditional petrochemical alternatives, especially with the recent dramatic rise in all petroleum-related products, and most importantly, has exceptional chemical qualities.

After successfully developing a core set of chemistry, the company was purchased by an investment group in June/2003 to then bring those products to market and continue R&D efforts. In Jan/2005, operations were relocated to the Cincinnati/Lexington area, and a robust supply chain network ideally located in the Midwest was created.

Now, with over \$3 million and over six years invested in the research and development of soy-based chemistry, Soy Technologies is the premier company in the industry, offering a full line of bio-based, biodegradable low-VOC solvents and water based products in bulk, company branded packaging, or private label.

### Target Markets

Soy Technologies sells products to manufacturers, distributors, and industrial users. Products have been developed and currently being marketed through distribution in the following market sectors: paint and coatings, cosmetics, janitorial, foodservice, and industrial. Products have been shipped to eight international markets, and, through distribution, are ideal for government sales at all levels.

# Product Overview

**Made in the USA**

## Soyanol™ Multiple Function Additives for Paints and Coatings

**Soyanol™** is the company's newest brand for an innovative product line of soy-based additives designed to enhance performance, reduce VOC content, and eliminate phthalate based plasticizers. **Soyanol™** provides today's coatings formulators with a powerful new set of tools to formulate low VOC solvent and water borne coatings. Applications include coalescent, plasticizer, and solvent replacement. Products include the following:

	Solvent	Emulsion		Solvent	Emulsion
Soyanol™ 1000E		X	Soyanol™ SGE40 Resin		X
Soyanol™ 5000E		X	SoyRez 40 Resin System *		X
Soyanol™ 5000X	X		Soyanol™ NPR-3 (Nail Polish Remover)	X	
Soyanol™ 5000X-HS	X		Soyanol™ NPR-4 (Nail Polish Remover)	X	

\* Custom Blend and licensed by NCC.

## SoyGreen® Solvents & Emulsions

**SoyGreen®** solvents are unique soy-based blends, effective for a variety of applications, and available in a number of formulations. Formulated to replace many common terpene and petrochemical based products including mineral spirits, d-limonene, naphtha, and toluene, SoyGreen® solvents are completely environmentally safe by any definition – low VOC's, bio-based, readily biodegradable, non-flammable, and manufactured in a ISO-9002/14001 certified facility. SoyGreen® blends are available in liquid and thickened versions, and solvent and dilutable water based emulsions:

Solvent		Emulsion		Solvent		Emulsion		Solvent		Emulsion	
<b>SG1000</b>		X		<b>SG 6000</b>		X		<b>SG EnviroGel</b>		X	
• Stainless Steel Cleaner	X			• Graffiti Remover (Good)	X			• Graffiti Remover (Best)	X		
• Spray n Shine SS Cleaner		X		• Paint Stripper (Good)	X			• Paint Stripper (Best)	X		
• Wood Polish and Multi-Surface Cleaner		X		• Paint Overspray Remover	X			• Lead Paint Remediation	X		
• Dustmop Treatment	X			• Gel Version of SG 5000	X						
• SG1000E Concentrates		X						<b>SG EnviroClear</b>		X	
				<b>SG PolyStripper</b>				• Liquid Version of EG	X		
				• Graffiti Remover (Better)	X						
<b>SG5000</b>		X		• Paint Stripper (better)	X			<b>SG Press Wash</b>		X	
• Mastic & Adhesive Rem.	X							• Press Wash		X	
• Parts Washing	X			<b>SG PolyClear</b>				• Screen Wash		X	
• Power Degreaser		X		• Tile/Grout Cleaner	X						
• SG5000E Concentrates		X		• Liquid Version of PS	X						

## SoyFast™ All Purpose Cleaners

**SoyFast™** was the first commercially available soy-based micro-emulsion (water white clear emulsion). SoyFast™ All Purpose Cleaner is ideal for commercial kitchens, industrial and building maintenance. SoyFast™ Base is a super-concentrate, can be diluted up to 1:300, and is an excellent carrier for additional ingredients added by customers. SoyFast™ Concentrate is a RTU cleaner and can be further diluted up to 1:20 for light cleaning.

## Speciality Products

Soy Technologies is constantly researching new concepts and chemistries. Current development includes emulsions for water based paints and coatings, agricultural applications, cosmetics, and brush cleaning applications. Finished products which are available for private label or bulk purchase include: SoyDerm®, a patented waterless hand cleaner; SoyFresh, a unique all natural bathroom air freshener; SoyBug, an all natural insect repellent; and Chain Butter, an all natural, extremely effective bicycle chain lubricant. In addition, many of our core chemistries can be easily modified to create custom blends tailored and unique to your application and private label brand.
