

NAB 9000 Products Overview

- **environmentally safe, hard surface degreaser**
- **non-hazardous**
- **free rinsing**

The NAB 9000 series is an aqueous-based, pH neutral, hard surface degreaser. It is considered to be non-hazardous as defined by current EPA and OSHA standards. This environmentally safe product will not deplete the ozone layer and contains no harmful solvents. The NAB 9000 series is a neutral product line that does not contain butyl cellosolve, butyl carbitol, CFCs, phosphates or corrosive chemicals. It contains no chemicals considered to be reportable under EPA SARA Title III Section 313.

North American Biotechnologies Corp, located in Milwaukee, Wisconsin is committed to the preservation of the environment through strategic partnerships with our customers. It is a full service biotechnology company that uses naturally occurring microbes in conjunction with neutral chemistries in the manufacture of its products.

NAB offers marketing, field support, engineering and technical service, and training of company personnel to handle all customer needs and specific industry requirements.

Comparison to Existing Aggressive Technologies

	Hazard Designation	Applicability	Waste Treatment Recommended	Rinability	* Reportable under SARA Title III Sec. 313
NAB 9000	Non-hazardous	Floor cleaning Parts washing Hard surface cleaning	Bioremediation	Free Rinsing	No
Cleaners: Alkaline & Caustic	Corrosive	Parts washing Floor scrubbing	Oil removal & disposal pH adjustment	Leaves residue	No
Solvents	Combustible	Parts Washing	Oil removal Recycling Oil disposal	Leaves residue	Yes
CFCs (trichloroethane, 1,1,1 trichlor)	Non-combustible	Parts washing	Oil removal Recycling Oil disposal	No residue through evaporation	Yes

NAB 9000 Product Specifications

specific gravity:	1.034	flashpoint:	none
pH (1% solution):	7.0	storage temp:	45° - 85°F
freezing point:	32°F	miscibility in water:	complete
appearance:	hazy, clear liquid	odor:	slightly medicinal

The NAB 9000 series uses state-of-the-art technology to remove light oils and greases from most hard surfaces including floors and metal parts. The product chemistry involves a balanced surfactant package that results in oil precipitation and separation, allowing free rinsing.

The NAB 9000 series has successfully replaced many harmful solvents including CFCs, ketones, alcohols, aliphatic and aromatic hydrocarbons in degreasing operations.

Because of changing federal, state and local wastewater discharge regulations, the permissible hydrocarbon content and/or BOD discharge levels will vary. Contact your local municipal wastewater treatment facility as to guidelines for legal discharge parameters to assure compliance with all local, state, and federal regulations.

Read and understand MSDS before using this product. Follow all directions and safety precautions. Do not freeze. Consult your sales representative for more details, pricing and package sizes.
