

# **CLEANING LABORATORY EVALUATION SUMMARY**

SCL #: 2007

DateRun: 11/13/2007

Experimenters: Shweta Bansal

ClientType: Lab

ProjectNumber: Project #1

Substrates: Ceramics, Plastic, Steel

PartType: Coupon

Contaminants: Hucker's Soil

Cleaning Methods: Manual Wipe

Analytical Methods: Gravimetric

Purpose: Laboratory evaluations of alternative cleaning products

Experimental Procedure: Basic cleaning performance testing was conducted using ASTM G122 as the bases for cleaning. Several "do-it-yourself" home formulations were evaluated for performance on several substrates and typical soils for all purpose cleaning. All Purpose Cleaner Formulations:

Home Formulation 1 - Dissolve 4 tbs baking soda in 1 qt warm water for a general cleaner

Home Formulation 2 - Vinegar and salt, mix together into a paste for a good surface cleaner (another version is mix salt and water together with a little vinegar)

Home Formulation 3 - Liquid castile soap (small amount) and baking soda/borax with lots of water for floors walls or counters

Home Formulation 4 - Liquid castile soap (medium amount) and baking soda/borax for tubs, sinks, cat boxes or anything that can be well rinsed.

Home Formulation 5 - Baking soda and water, make a paste for all purpose cleaner

Home Formulation 6 - 3 tbsp vinegar, ½ tsp washing soda, ½ tsp vegetable based liquid soap (Murphy's), 2 cups hot water and put in spray bottle or bucket. Apply and wipe clean. General cleaner

Home Formulation 7 - 2 tbsp borax, ¼ cup lemon juice, 2 cups hot water. Combine in spray bottle and use as all purpose

Home Formulation 8 - Fill a spray bottle with ½ part vinegar and ½ part water. Add some lemon juice for scent

Home Formulation 9 - Mix liquid soap with 1 tbs of baking soda. Add lemon juice and water.

Cleaning: Spray cleaner on the coupons  
30 secs Manual Wipe  
Cleaning at 68 F  
Contaminant: Huckers Soil  
Substrate: 2"x 4"x 0.06"

Results:

Product	Average (%)
Home Formulation 1	
Ceramic	26.91
Painted Steel	137.41
Plastic	48.58
Home Formulation 2	
Ceramic	-27.84
Painted Steel	-109.96
Plastic	-349.84
Home Formulation 3	
Ceramic	-33.81
Painted Steel	-24.61
Plastic	-22.16
Home Formulation 4	

## CLEANING LABORATORY EVALUATION SUMMARY

Ceramic	-58.05
Painted Steel	-192.68
Plastic	-330.51
Home Formulation 5	
Ceramic	-34.23
Painted Steel	-423.13
Plastic	
Home Formulation 6	
Ceramic	20.99
Painted Steel	29.37
Plastic	-7.52
Home Formulation 7	
Ceramic	34.97
Painted Steel	75.05
Plastic	368.76
Home Formulation 8	
Ceramic	18.86
Painted Steel	45.73
Plastic	-8.29
Home Formulation 9	
Ceramic	40.58
Painted Steel	55.35
Plastic	92.13

Summary:

<b>Substrates:</b>		Ceramics, Plastic, Steel			
<b>Contaminants:</b>		Hucker's Soil			
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
No Specific Vendor	Home Formulation 1	100	70.97	<input checked="" type="checkbox"/>	
No Specific Vendor	Home Formulation 2	100	-162.55	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 3	100	-26.86	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 4	100	-193.75	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 5	100	-278.68	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 6	100	14.28	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 7	100	159.59	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 8	100	18.77	<input type="checkbox"/>	
No Specific Vendor	Home Formulation 9	100	62.69	<input checked="" type="checkbox"/>	

Conclusion:

Many of the mixtures left behind a lot of residue when using the standard laboratory procedures for commercial cleaning products. Modification of the cleaning process may improve the effectiveness of these "do-it-yourself" formulations.

Home formulation 1 and 9 showed some signs of effectiveness, removing over 60% of the all-purpose soil.
