

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2021

DateRun: 05/05/2021

Experimenters: Ross Goding, Edward Judge

ClientType: Lab

ProjectNumber: Project #4

Substrates: Glass/Quartz, Chrome

PartType: Coupon

Contaminants: Glass

Cleaning Methods: Manual Wipe

Analytical Methods: Gravimetric, Visual

Purpose: To test the efficiency of Gain Dish washing on the removal of glass soil from chrome, glass, and mirror substrates.

Experimental Procedure: Initial weights of each substrate (chrome, glass, mirror) were taken and subsequently soiled with 0.5 grams of SSL soil 2 glass soil. The soil was allowed to air dry for 24 hours before taking dirty weights. After dirty weights were recorded, each substrate was manually wiped using the SLW unit. Each coupon was sprayed with 2 sprays of the cleaner along with the SLW wipe sprayed with 2 sprays. Manual wiping occurred for 20 wipes for all coupons.

Results: Results for gain dishwasher did not produce with a good product removal rating. Overall, the product (tested on 3 substrates) had a removal rating of 78.33 percent. Gain dish washing seemed to struggle in removing SSL soil 2 glass soil from chrome and glass surfaces. It did however, produce an average removal rating of 94 percent on mirror substrates. This was due to a lower final weight than initial weight. That could have been due to the coupon not being cleaned properly before hand or the scale gave the incorrect number for coupon weight.

Cleaner	Substrate	Coupon	Initial wt. of con.	Final wt. of con.	% Removal	Average % removal	Product removal
A	1	12	0.05	0.03	46.17	64.17	78.33
		13	0.12	0.01	88.74		
		24	0.04	0.02	57.60		
	2	14	0.12	0.03	74.27	76.53	
		11	0.04	0.01	78.80		
		46	0.11	0.03	76.53		
	3	17	0.11	0.03	71.77	94.30	
		5	0.10	0.02	79.26		
		12	0.08	-0.02	131.87		

Summary:

Substrates:		Glass/Quartz, Chrome			
Contaminants:		Glass			
Company Name:	Product Name:	Conc.:	Efficiency:	Effective:	Observations:
Korex Canada	Gain Formula (revised 15-359)	1/3	78.33	<input type="checkbox"/>	Gain Dishwashing was not effective in the removal of Glass Soil from various substrates.

Conclusion:

This product overall was not effective at removing SSL soil 2 glass soil from chrome, glass and mirror substrates. All coupons had traces of soils left over after cleaning with low removal percentages.
