

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2021  
 DateRun: 12/01/2021  
 Experimenters: Zoe Lawson, Nicole Kebler, Tatyanna Moreland Junior  
 ClientType:  
 ProjectNumber: Project #2  
 Substrates: Food  
 PartType: Coupon  
 Contaminants: Food  
 Cleaning Methods:  
 Analytical Methods: Smell

Purpose: To evaluate the odor removal of Funk Away with spoiled milk.

Experimental Procedure: Three jars of spoiled milk were prepared for this experiment. One jar acted as a control, the second would be reserved for Funk Away, and the third was used with a comparative product. Each panelist was asked to describe spoiled milk and to rank the level of intensity of the malodor; from 1 being no malodor to 5 being high malodor levels. Afterwards, the jars were subjected to rounds of cleaning agent treatment, one treatment cycle consists of 2 sprays and each panelist was used to assess malodor levels after each cycle of treatment. Treatments of contaminated jars were stopped after three treatment cycles. The bottles were then allowed to age over a period of 3 days. Following the sit, panelists were asked to determine the bottles' malodor ratings to obtain an increase in malodor baseline from the day after it was treated. The jars were subject to one last treatment cycle before the final set of malodor ratings were performed. An effective cleaner will have a malodor level of under 2 after the 3<sup>rd</sup> round of treatment.

Results:

	Panelists			
Treatment	I	II	III	Treatment Average
Control	5	5	5	5
Funk Away				
Treatment	I	II	III	Treatment Average
Untreated	5	5	5	5
2 sprays	3.5	3	4	3.5
4 sprays	3.5	4	4	3.8
6 sprays	4	4	4	4
After 3 days	3.5	3	3	3.2
8 sprays	2.5	3	3.5	3
Comparative Product				
Treatment	I	II	III	Treatment Average
Untreated	5	5	5	5
2 sprays	4	4	4.5	4.2
4 sprays	4	4	3.5	3.8
6 sprays	3.5	3.5	3.5	3.5
After 3 days	4	3.5	4	3.8
8 sprays	3.5	3	3.5	3.3

Summary:

<b>Substrates:</b>		Food			
<b>Contaminants:</b>		Food			
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
Market Ready	Funkaway	100		<input type="checkbox"/>	

Conclusion:

Funk Away and the comparative product both performed similarly with final average treatment scores being 3.0 and 3.3. Funk Away was slightly better at reducing malodor than the comparative product after 3 days.
