

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2024
 DateRun: 10/02/2024
 Experimenters: Cindy McClaughlin, Rachael Rososky
 ClientType: Cleaner Manufacturer
 ProjectNumber: Project #2
 Substrates: Ceramics, Plastic, Stainless Steel
 PartType: Coupon
 Contaminants: DCC-17
 Cleaning Methods: Manual Wipe
 Analytical Methods: Gravimetric

Purpose: To evaluate the efficacy of FB-1000 at various concentrations and temperatures compared to a 2% caustic cleaner in removing DCC17 grease soil from a variety of substrates.

Experimental Procedure: A total of 27 coupons, three each of stainless steel, plastic, and ceramic per product solution, were tested using FB-1000 at 10%, 2%, and 1% dilutions, and Alpha Chemical's Veracity Caustic Cleaner (sodium hydroxide) at a 2% concentration. FB-1000 was tested at room temperature (68°F) and 120°F, while the comparative caustic cleaner was tested only at room temperature.

Initial coupon weights were recorded before contamination with DCC-17 (0.25g applied to each coupon using a handheld swab). After drying overnight, the contaminated "dirty" weights were recorded. Three coupons per substrate were cleaned in a Gardner Straight Line Washability (SLW) unit using a Kimberly-Clark Wypall towel and two sprays of cleaner (~2.5 mL per coupon) at the designated temperature. Cleaning involved 20 cycles (~30 seconds). Cleaned coupons were air-dried for 24 hours before final weights were recorded to quantify soil removal and evaluate cleaning efficacy.

Results:

Product/ Dilution	Temp (°F)	Substrate	Initial wt. (g) of cont.	Final wt. (g) of cont.	%Cont. Removed	Average % Removal	Overall % Removal (Temp.)

FB-1000 at 1% and 2% dilutions demonstrated grease removal effectiveness comparable to the 10% solution. All three FB-1000 dilutions at room temperature performed as effectively as their heated counterparts.

Summary:

Substrates:	Ceramics, Plastic, Stainless Steel					
Contaminants:	DCC-17					
Company Name:	Product Name:	Conc.:	Efficiency:	Effective:	Observations:	
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	10%	92.94	<input checked="" type="checkbox"/>		
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	10%	92.78	<input checked="" type="checkbox"/>		
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	2%	90.75	<input checked="" type="checkbox"/>		
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	2%	89.38	<input checked="" type="checkbox"/>		
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	1%	90.95	<input checked="" type="checkbox"/>		
Innovative Chemical Technologies, Inc.	Virdivis FB1000 (ICT 1648L)	1%	91.25	<input checked="" type="checkbox"/>		
Alpha Chemical Services	Veracity Caustic Cleaner	2%	94.79	<input checked="" type="checkbox"/>		

Conclusion:

FB-1000 at 10%, 2%, and 1% dilutions demonstrated grease removal effectiveness comparable to 2% Veracity Caustic Cleaner, both when heated and unheated, on stainless steel, plastic, and ceramic substrates.
