

CLEANING LABORATORY EVALUATION SUMMARY

SCL #:	2001									
DateRun:	06/11/2001									
Experimenters:	Jason Marshall									
ClientType:	Metal									
ProjectNumber:	Project #1									
Substrates:	Steel									
PartType:	Coupon									
Contaminants:	Cutting/Tapping Fluids, Lubricating/Lapping Oils, Oil									
Cleaning Methods:	Ultrasonics									
Analytical Methods:	Gravimetric									
Purpose:	To evaluate successful cleaners on third contaminant.									
Experimental Procedure:	The four successful cleaners from the previous trial were again diluted to 5% using DI water in 600 ml beakers and placed in a Crest 40 kHz ultrasonic tank model 4Ht 1014-6. Solutions were heated to 130 F. Twelve preweighed coupons were coated with Spartan Chemical MOAC 2945 (64742-52-5, 64742-53-5, 63449-39-8, 68608-26-4, 68918-91-2, 8002-26-4, 111-46-6, 107-41-5, 4719-04-4) and reweighed. Three coupons were immersed into each solution and cleaned for five minutes. The coupons were rinsed in tap water at 120 F for 30 seconds and dried using a Master Appliance Corp, Hot-air gun model HG-301A at 500 F for 1 minute. Final "clean" weights were recorded and efficiencies were calculated.									
Results:	Again all four cleaners were very successful in removing the contaminant from the steel coupons. T table lists the calculated results for each solution.									
	Cleaner Coupon 1		Ż	3		Dev				
	1	99.85	100.0		+ + +	0.11				
	2	99.56	100.0			0.29				
	4	100.14	100.0 100.0							
	During t the coo may be	During the cleaning process, it was observed that all four solutions required 2 minutes or less to remove the coolant. When the coolant was removed from the coupon, the cleaning solution become cloudy. This may be a problem for treatment of the solution after prolonged use.								
Summary:	Subst	rates:	S	iteel						
	Contaminants:			Cutting/Tapping Fluids, Lubricating/Lapping Oils, Oil						
	Company Name:			Product Name:		Conc.:	Efficiency:	Effective:	Observations:	
	Oakite	Products		Inproclean 3800		5	99.98	V		
	Magnaflux Bio Chem Systems			Daraclean 283		5	99.89	V		
				Green Stuff 6325		5	100.08	V		
	Today &	Beyond		Beyond 2001		5	100.08	1		
Conclusion:	The four solutions removed all of the contaminant from the coupons within 2 minutes of ultrasonic									

cleaning. The contaminant did not separate out from the cleaning solution after the trial was completed.
