

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2009  
 DateRun: 10/27/2009  
 Experimenters: Jason Marshall, Junhee Cho, Scott Nadolna  
 ClientType: Cleaner Manufacturer  
 ProjectNumber: Project #1  
 Substrates: Ceramics, Plastic, Steel  
 PartType: Coupon  
 Contaminants: Hucker's Soil  
 Cleaning Methods: Manual Wipe  
 Analytical Methods: Gravimetric  
 Purpose: To evaluate new formulation for all purpose cleaning following GS 37 requirements.

Experimental Procedure: The supplied cleaning product was used at the supplied concentration (4%). A second product, selected by the lab, was used at the vendor supplied concentration. Prewieghed ceramic were coated with Hucker's Soil Formulation (Jif Creamy Peanut Butter 9.2%, Salted Butter 9.2%, Arrowhead Mills stone ground wheat flour 9.2%, Egg Yolk 9.2%, Evaporated milk 13.8%, Distilled water 45.8%, Printer's ink with boiled linseed oil 0.9%, Shaws saline solution 2.7%) using a handheld swab and allowed to dry for 24 hours at room temperature. The contaminated coupons were weighed again to determine the amount of soil added.

Three coupons were placed into a Gardner Straight Line Washability unit. A Kimberly Clark Reinforced paper towel was attached to the cleaning sled and soaked with 5-7 sprays of cleaning solutions. Each coupon was sprayed 7-10 times with the same cleaning solution. The solution was allowed to penetrate for 30 seconds followed by cleaning in the SLW unit for 20 cycles (~33 seconds). At the end of the cleaning, coupons were wiped once with a dry paper towel. Final weights were recorded, and efficiencies were calculated and recorded.

Results: Both the supplied product and conventional product were ineffective in removing the Hucker's Soil with a manual wiping action. The table lists the amount of soil initially added and the amount remaining after cleaning and the product efficiency for each coupon cleaned.

Summary:

<b>Substrates:</b>	Ceramics, Plastic, Steel				
<b>Contaminants:</b>	Hucker's Soil				
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
Cleanline Products	H2O2 Super Citrus Concentrate	4	75.96	<input type="checkbox"/>	
Clorox Company	Formula 409 All Purpose Cleaner	100	77.20	<input type="checkbox"/>	

Conclusion:

The supplied product had an overall average efficiency less than 85% and would not be considered effective based on the SSL testing methodology for all purpose cleaning. A follow up test will be conducted using a higher concentration for the supplied product.
