

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2003
DateRun: 09/02/2003
Experimenters: Jason Marshall
ClientType: Manufacturing
ProjectNumber: Project #1
Substrates: Aluminum, Plastic, Teflon
PartType: Coupon
Contaminants: Waxes
Cleaning Methods:
Analytical Methods:

Purpose: To generate a list of products that would be suitable for wax removal from coated aluminum parts.

Experimental Procedure: Using the laboratory's database for solvent cleaning substitution, the lab generated the following lists of products. The products have been evaluated at SSL under similar conditions to the client's criteria.

Results: Two lists of test results were generated. The first was for wax removal from aluminum substrates, and the second was for wax removal from other substrates. The specific wax information was also included when available.

Summary:

Conclusion:

Cleaning varies from case to case. The SSL recommends process specific testing on potential replacement cleaning chemicals. If more information is needed on a particular product, or you are interested in conducting cleaning trials, please contact the lab at (978)934-3133.
