

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2016  
 DateRun: 02/03/2016  
 Experimenters: Alicia Melvin, Carla De La Cruz, Rhoda Gindi, Catherine York  
 ClientType:  
 ProjectNumber: Project #1  
 Substrates: Stainless Steel  
 PartType: Coupon  
 Contaminants: Greases  
 Cleaning Methods: Immersion/Soak  
 Analytical Methods: Gravimetric  
 Purpose: To conduct testing on possible drop in solvents for Dow grease.

Experimental Procedure: Stainless steel coupons were selected and arranged into rows of 3 coupons, a row per cleaner. Initial weights were taken, and coupons were soiled and reweighed. The lower third of the coupons were soiled. beakers with drop in solvent replacement solutions were set up on stirring plates equipped with a stir bar. The coupons were immersed for 5 minutes. Observations were taken during the cleaning process. The coupons were dried on a rack for 15 minutes. Final weights were recorded.

Results: Some drop in solvents were effective on the Dow Grease. Based on visual observations, the Solstice products seemed more effective cleaners.

Summary:

<b>Substrates:</b>	Stainless Steel				
<b>Contaminants:</b>	Greases				
Company Name:	Product Name:	Conc.:	Efficiency:	Effective:	Observations:
Honeywell	Solstice PF-2A with N2	100	87.62	<input checked="" type="checkbox"/>	Results were streaky.
Honeywell	Solstice PF with N2	100	87.13	<input checked="" type="checkbox"/>	Residue intensified during drying
NuGeneration Technologies, LLC	FluoSolv CX	100	14.27	<input type="checkbox"/>	White residue developed during drying
NuGeneration Technologies, LLC	FluoSolv NC 786	100	91.43	<input checked="" type="checkbox"/>	White film developed during the drying period.
Xf Technologies	Methyl 408	100	2.31	<input type="checkbox"/>	Clumping effect occurred.
Xf Technologies	Ethyl 408	100	-0.90	<input type="checkbox"/>	Clumping effect occurred.
DuPont	Vertrel Sion	100	58.40	<input type="checkbox"/>	
NuGeneration Technologies, LLC	Fluosolv FR-100	100	3.93	<input type="checkbox"/>	

Conclusion:

Honeywell Solstice PF-2A, Honeywell Solstice PF, and Ecolink Fluosolv NC 786 were most effective in removing Dow Corning Vacuum Grease.
